

“A new frontier in research and development”

PROFILE 2024

Smart Vision for
Consultancy & Development

ABOUT US

Smart Vision for Consultancy and Development was incorporated in 2011 in Somalia. We focus majorly on monitoring, evaluation, research and learning (MERL), institutional capacity development services, private sector development, quality infrastructure and trade facilitation, mainly in Somalia and across the greater Horn of Africa region. At Smart Vision, we are committed to professionalism, timely and quality service delivery.

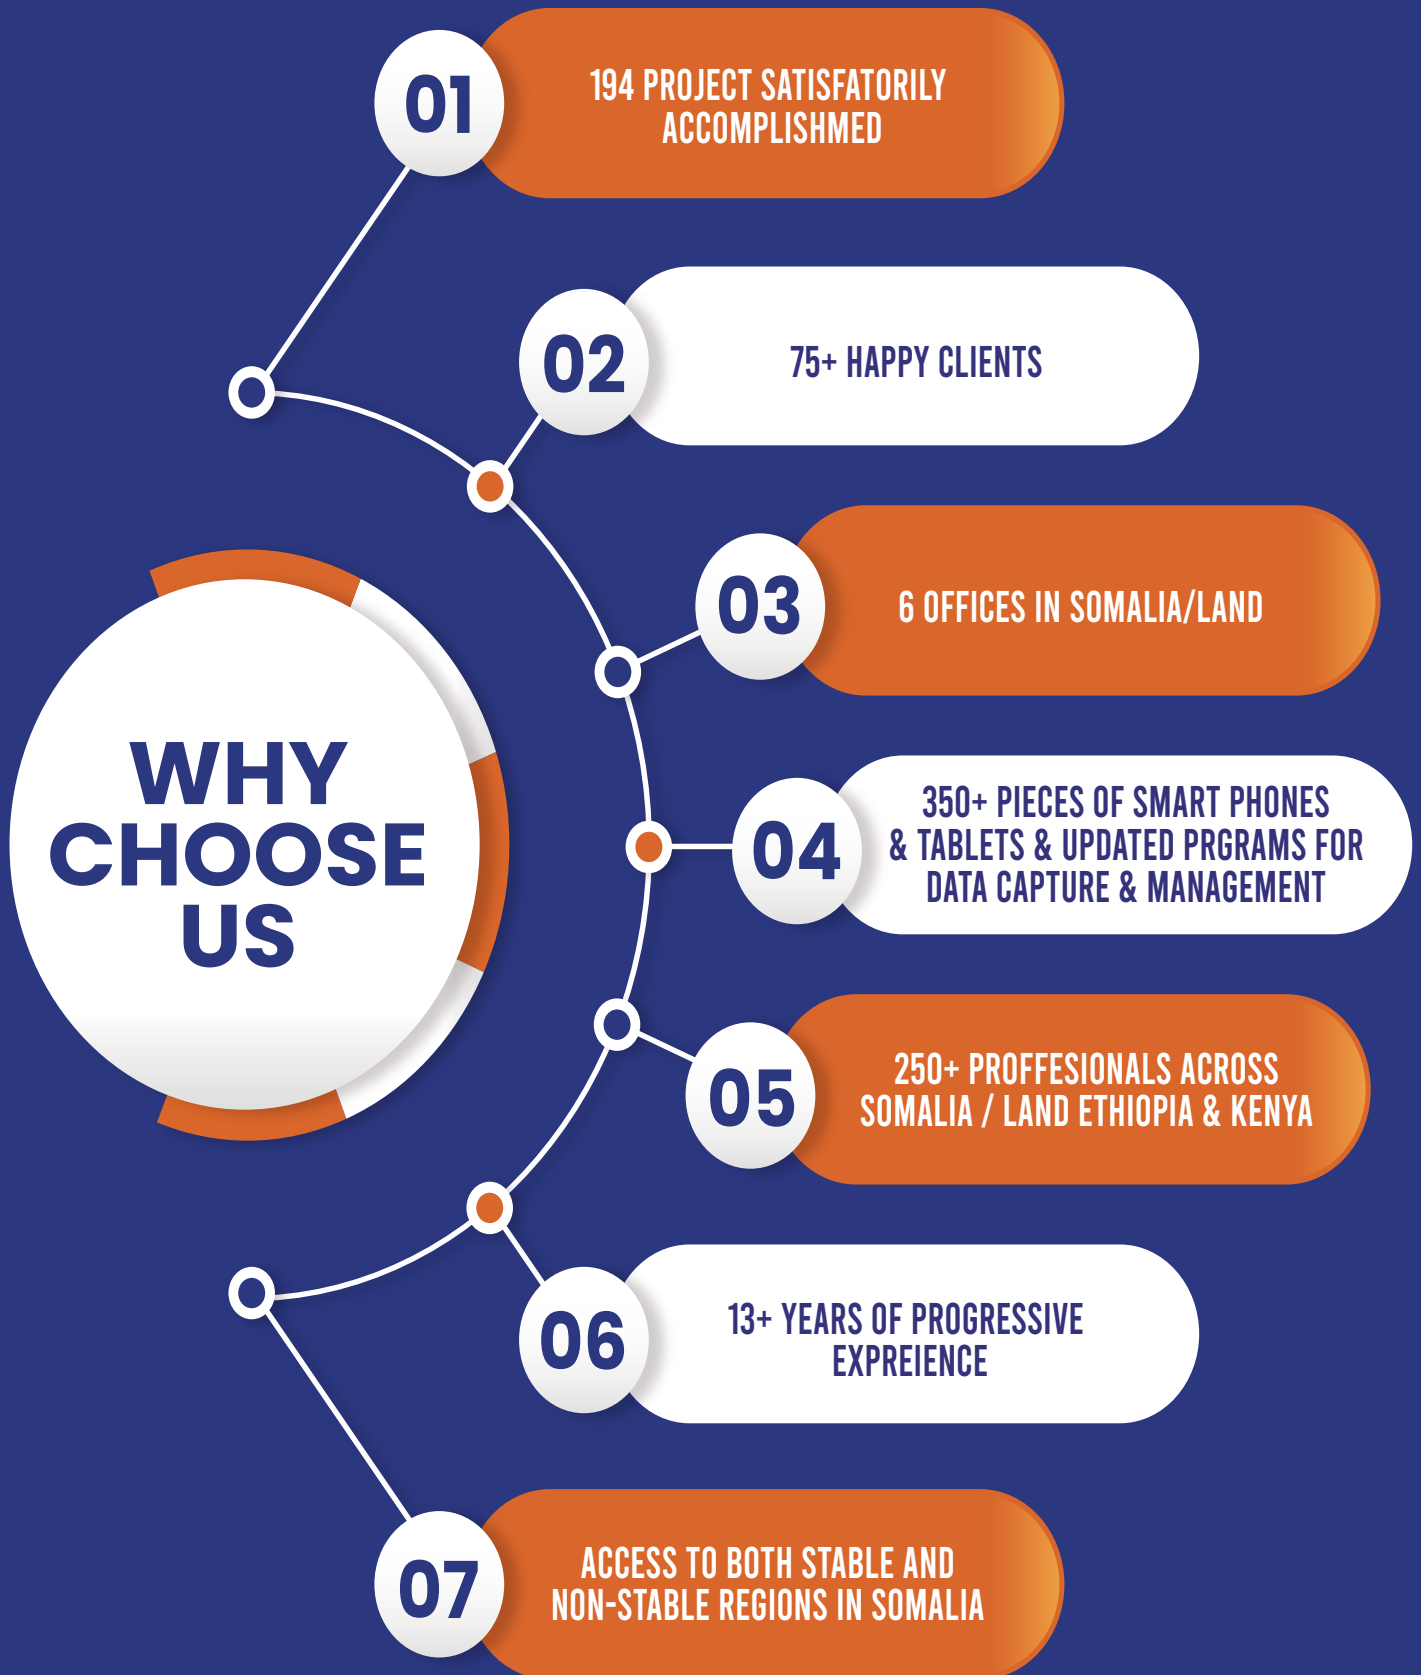

Vision

To be the industry leader in the world providing research and development consultancy services

MISSION

To offer a comprehensive suite of reliable data-driven services to improve clients' programming and operational outcomes in a sustainable manner

OUR SERVICES

OUR ACHIEVEMENT

OUR SERVICES

Third Party Monitoring

Given the fluid security situation and the difficult terrain of Somalia, international staff is often too encumbered to travel to project locations. With our presence across the various regions in the country, we have access to project sites, however rural or urban, and carry out designated assignments. We are able to update on location and support clients to track changes in program outputs and performance over time, thereby providing regular feedback and early indications of progress or lack of it. This helps our clients to make informed decisions regarding the design and effectiveness of on-going projects in good time.

We have adequate capacity to collect data with the aid of paper tools or Open Data Kit (ODK) platform. We ensure that the client's project team has up to date data in hard and soft copies or as per the ODK system, continuously reviewing MEL data to enable management make informed decisions for achieving the project targets. We also visit projects to document and report case studies and success stories as the clients' need may necessitate.

Midterm and endline Evaluations

At Smart Vision, we provide quality Midterm and endline evaluation services. Meticulously selected professionals in our team give the organization an international outlook and expertise to handle emerging clients' needs in regard to evaluations. Our team is always ready to analyze the performance of projects/programmes given any agreed criteria.

Baseline surveys

We plan and execute high quality baseline surveys to provide reliable data that reflects accurate pre-project conditions in line with project verifiable indicators. This enables clients to understand the starting point, and set benchmarks upon which projects' progress and impact are later measured. Further, we are able to conduct situational analyses and offer clients insightful reports on the ground scenarios.

Special studies and research

Smart Vision carries out special studies and assessments on demand to gather necessary evidence to ensure that decisions are taken and programs implemented based on sound information from the ground. In addition, we carry out general research to bridge the knowledge gap on topical issues relevant to humanitarian work and contemporary issues within Somalia and beyond.

Environmental and social impact Assessment

Smart Vision is privy to the climatic changes happening around the world. We look for opportunities to reduce the harmful environmental effects of human operations, and support activities that promote the protection of human health and a sustainable global environment.

We conduct Environmental and Social Impact Assessments for various development projects in different sectors including infrastructure, energy, mining, industry, and built environment, and develop management plans for appropriate mitigation measures. Our team comprises highly qualified and experienced staff ranging across the Environmental, Health and Safety disciplines, who are on the ready to provide legislative/regulatory and technical support to clients.

Setting up MEAL systems and training

Strong Monitoring, Evaluation, Accountability and Learning are critical to program/project success including those operating in fragile contexts. With an effective MEAL system, we are able to track progress and make necessary adjustments. Besides conducting different kinds of research-based assignments, Smart Vision also sets up, evaluates and trains the project team. MEAL training introduces the M&E processes that strengthen accountability and learning, and so promote project/program and strategy effectiveness.

Quality infrastructure and trade facilitation (Training and capacity building)

Quality infrastructure is the system put in place to ensure products and services are safe and of set standards. We have adequate capacity- in well trained and experienced staff- in metrology, measurement for legal and industrial conception calibration, Conformity assessment, quality assurance, inspection, testing, certification, quality infrastructure concept, WTO/TBT requirement in trade and quality infrastructure contribution, SPS and trade facilitation. Indeed, we set the standards in provision of professional advice in the respective industry and on ISO certification.

Institutional capacity development

Smart Vision sets up strong strategic foundation for long term goal or roadmap for its clients. We undertake the necessary steps for successful business strategy, e.g. conducting SWOT analyses, clarifying and setting out mission, vision and values. We follow this up with a selection of an appropriate strategic management framework and develop envisaged five-year plans replete with SMART objectives. Further, Smart Vision is a leader in policy formulation process and guides in development of new policies and improvement of existing ones. We also conduct institutional capacity assessments and capacity building in professional manner.

Business Development Services (BDS)

We support clients by offering Business Development Services (BDS) to improve performance of the enterprise, its access to markets and their ability to compete. We also assess and develop and/or improve business strategies and business operations through capacity building in planning, organizing, directing, coordinating and controlling of the various aspects of production, such as procurement, manufacturing, distributions and marketing. We also train and capacitate enterprises.

Translation, proof reading and editing:

Smart Vision offers high quality translation, proofreading, and editing services that guarantee effective delivery of information to both internal and external audiences.

ENDLINE EVALUATION

<p>Jan to Feb, 2024</p>		<p>The purpose of the joint end line evaluation/ new baseline is to assess the overall performance, outcome and impact of the project with an aim of providing realistic and feasible recommendations for improving similar programs in Somalia/Somaliland context. The consultant will conduct final evaluation for BHAFY2023 project in Awdal, Bari, Nugaal, Hiiraan, Bay, Bakool and Lower Shabelle, Waqooyi Galbeed where the mainly Health, Nutrition, WASH and Food assistance and Child protection were implemented.</p>
<p>October to Nov, 2023</p>		<p>Smart Vision for Consultancy and Development was contracted to conduct the final evaluation for the project HOA by SOS Children's Village. The aim was to evaluate the extent to which the project has reached and benefited the targeted beneficiaries in the operational priority areas of Heliwa, Kahda, Baidoa, Balcad and Hudur districts in Somalia</p>
<p>Sep, 2023 to Nov, 2023</p>		<p>Baseline Evaluation for GFFO/BMZ Chapeau Nexus Project. The project has been developed aiming to integrate humanitarian multisectoral emergency response in Bay, Galgaduud, Mudug and Hiiraan regions of Somalia with community resilience programming for period of 5 years. Smart Vision was contracted to conduct Baseline Evaluation.</p>
<p>May to June 2023</p>	<p>SOYDAVO</p> 	<p>Contracted endline Evaluation for the project 'Expanding Civic Space, Empowering Youth and Women to Contribute to the Governance and Development processes in Somaliland' is implemented by the 'Dan-Guud Consortium' and funded by the European Union. Under the 'Dan-Guud' umbrella, SOYDAVO leads three other co-implementing organizations: YOVENCO, SONSAF and Media INK. The project is also supporting other youth-led organizations such as MASAF. The project implementation effectively kicked off in January 2020 and will end in December 2022. The project aims at improving the role of women and youth CSOs in the decision-making and political space in Somaliland. This will be accomplished by the empowerment of the CSOs to be both a driving force for good governance and accountability as well as a mobilizer for related grassroots movements.</p>
<p>March to April, 2023</p>		<p>BHA Endline Evaluation. In response to the challenges discussed above, Save the Children International, Somalia program initiated an integrated project titled Sustainable Opportunities for more Accessible Livelihoods and Integrated Assistance. The goal of the program implemented in Somalia and Somaliland was: To save lives, alleviate suffering, maintain human dignity, and build resilience in communities experiencing humanitarian crisis and/or are food insecure. Smart Vision was contracted to conduct the endline evaluation.</p>

<p>Nov 2022 April 2023</p>		<p>Midterm Evaluation for the project FFO NEXUS was initially a 2-year project (January 2020 – Dec 2021), but was extended from January 2022 to September 2022, and additional 2 years of the project extension is also under progress. The project was designed to address the most pertaining challenges faced by the most vulnerable communities living in 7 regions in Somalia (Kismayo, Mogadishu, Adado, Mudug, Sool, Sanaag, and Togdheer). So far, the project funded by German Government, has benefited a total of 562,000 under five children and 473,000 children age between 6 to 14 years. The program is addressing the humanitarian priorities of Save the Children's Country Strategic Plan (CSP) for Somalia with focus on the humanitarian components. At the start of 2022, an updated CSP was introduced for the upcoming strategic period 2022 – 2024 to continue to ensure that children survive, learn and are protected.</p>
<p>June to Aug, 2021</p>		<p>End line Evaluation of Emergency Cash Transfer and Resilience Building Project in Sool and Togdheer in Somaliland. The intervention Emergency Cash Transfers and Resilience Building through CMAM in Eastern Somaliland acknowledges the consequences of slow onset droughts and other adverse weather conditions for vulnerable families in Eastern Somaliland.</p>
<p>Dec. 2020 April 2021</p>		<p>Monitoring and Evaluation Endline Survey for Garowe Intra City Roads RFP No: SO-GM-72049-CS-CQS. The overall objective of the Endline beneficiary survey is to measure who and to what extent people (including the vulnerable groups) benefited from the urban roads in Garowe as well as how it affects their lives in both social and economic terms as per specific criteria The evaluation will further measure project results using the key indicators defined in SURP's results framework</p>
<p>Dec. 2020 April 2021</p>		<p>Monitoring and Evaluation Endline Survey for the Rehabilitation and Construction of 19 Roads in 7 Districts of Mogadishu RFP No: SO-GM-72049-CS-CQS. The overall objective of the Endline beneficiary survey is to measure who and to what extent people (including the vulnerable groups) benefited from the urban roads in Garowe as well as how it affects their lives in both social and economic terms as per specific criteria. The evaluation will further measure project results using the key indicators defined in SURP's results framework</p>
<p>Oct-Dec. 2020 March, 21</p>		<p>Evaluation of Integrated Humanitarian life-saving health, nutrition, WASH, and livelihood project (Althani). The aim of the Final Evaluation was to assess the performance of the project and capture project achievements, challenges and best practices to inform future similar programming and to assess the project design, scope, implementation status and the achievement of the intended project objectives.</p>
<p>March to August 2020</p>		<p>The aim of the evaluation was to assess the project implementation and verify if the project met its intended purpose, objectives and targets in line with the set evaluation criteria. This was a joint venture between Smart Vision and Sayara International. Our role was to partially develop training package for the enumerators, train the enumerators on data collection skills using ODK Application, research ethics and ethical considerations, participate in the translation of data collection tools from English to Somali version, conduct and manage data collection exercise, clean and process data, translation of the audio files of qualitative interviews from Somali to English version and participate in the initial analysis of the report</p>

June 2020		SHF WASH Bari Endline Survey in Qardho, Bosaso and Iskushuban in Puntland. The purpose of the survey was to collect end-line data and compare the same with results of the baseline survey in order to assess the impact of the WASH support.
June 2019		Evaluation of Integrated Humanitarian Assistance to Vulnerable Population in Shabelle IDP Camp in Dharkenley. The aim of the evaluation was, to assess the project implementation and verify if the project met its objectives and targets in line with the set evaluation criteria.
April 2019		Final Evaluation of Puntland Democratic Governance Program. The evaluation was intended principally for learning purposes, accountability and to assist in charting the future of similar programs. It was further expected to generate relevant findings, lessons and recommendations that will guide and inform development of a new programme in the future.
Jan 2019		External Evaluation of the Integrated Health, Nutrition, WASH and Agriculture and Food Security Program in Gedo, Hiiraan, Mudug and Banadir regions. The aim of the Final Evaluation was to provide detailed analysis of achievements against the anticipated objectives and measure the up-to date performance of the project.
March 2019		Final Evaluation of DIALOGUE project DRC Somalia Country Programme. The purpose of the evaluation was to assess the project in terms of its (i) Impact; (ii) Coverage; (iii) Relevance and Appropriateness; (iv) Efficiency; (v) Effectiveness; (vi) Coherence; (vii) Coordination; (viii) Sustainability; and (ix) Conflict Sensitivity.
June 2018		Contracted to do Mid Term Evaluation of Puntland Democratic Governance Project. The objective of the evaluation was principally intended for learning purposes, accountability purposes and assisting in charting the future of the Programme.

ASSESTMENTS

<p>Aug to Sept 2023</p>		<p>The International Labour Organization (ILO) mandate within the JPLG has focused on job creation by improving the business environment and promotion of local economic development activities. To support the districts towards LED, ILO has been helping the district administrations in Somalia to establish participatory planning process, set up a LED Forum with membership from both the public and private sector to drive the process, mobilize resources for interventions as well as to manage the implementation of projects designed to stimulate economic activity and create employment opportunities. Smart Vision was contracted to conduct Local Economic Assessment in Southern regions of Somalia</p>
<p>Oct, 2021 to Jan, 2022</p>		<p>A WASH assessment was carried in schools from 13 regions of Somalia in December 2021. The objective was to undertake a formal assessment to establish the current school WASH situation and gaps in schools within SCI intervention areas, and that will be used to develop school WASH approaches and strategy. Additionally, the assessment was to generate quantitative and qualitative evidence about the outcomes of current WASH in schools and assess the underlying factors that have influenced sustainability. Data was collected using school checklist; observation form; individual and focus group discussions with pupils; and key informant interviews with school head teachers.</p>
<p>April to April 2021</p>		<p>Technical Support for REACT SSA Programme in Somalia project's Rapid Needs Assessment conducted at Sool and Sanaag regions of Somaliland</p>
<p>Sep-Dec 2020 Feb 2021</p>		<p>Fragility Index and Maturity Model (FIMM) Assessment in 15 Districts of Somalia. purpose of the District Fragility Index & Maturity Model (FIMM) assessment was to provide an in-depth look into the governance, social cohesion, peace building, security, rule of law, social-economic aspects of a district, including clan, women, youth and marginalized groups dynamics</p>
<p>March 2019</p>		<p>Conflict Assessment and Political Feasibility of "Nabad iyo Amni": Improving Community Safety in Elwak, Bardhere and Garbaharey districts, Gedo region, Somalia. The aim of this analysis was to understand latent and manifest conflict causes and dynamics to ensure relevance and conflict sensitivity of the Programme approach</p>
<p>Dec 2019</p>		<p>Sanitation Marketing Strategy and for IDP Camps in Mogadishu, Somalia. The strategy is initially intended for piloting of Sanitation Marketing in IDP settlements in Mogadishu. But once tried, it is expected to guide the line ministry in Somalia and the private sector to roll out sanitation marketing in all settlements both in urban and rural areas in the country</p>
<p>Nov 2019</p>		<p>Framework for Management of Strategic Water Points (Earth dams) in Selected Districts for in Puntland. The framework provides guidelines to improve Water Resource Management for various water users for the selected strategic project water points in some selected districts in Puntland.</p>

Dec. 2017		A Prospective Positive Deviance Analysis Research in Beletweyne District, Hiran Region Somali. The aim of the study was to assess Positive Deviance (PD) among communities (or individuals) towards drought and generate knowledge from such coping strategies that can be up-scaled or replicated in other similar situations.
Nov. 2017		Assessment of Knowledge Attitude and Practice in IDP Settlements in Baidoa and Berdale Districts of South- central Somalia. The purpose of this was to establish the water and sanitation situation and measure the targeted population's knowledge, attitudes and practices on hygiene indicators. This pre-project KAP assessment was to inform the design of WASH intervention and provide baseline data that will be compared with end-line data in order to empirically demonstrate effectiveness and impact of the WASH response
August 2017		Impact assessment of SomRep Phase I and Village Level Resilience Programme in Gedo Region Somalia. The aim of the evaluation was to assess how Vocational Skills Training, Village Savings and Loans Associations and Small and Medium Enterprise beneficiaries are doing, and how they have been able to cope with the current drought. It was also to assess impact of SomRep Phase I and inform Phase II of the project.
2017 April		Assessment of Knowledge Attitude and Practice (KAP) Survey on Infant and Young Child Feeding (IYCF) and WASH in Shabelle IDP Camp, Mogadishu. The purpose of this was to document the knowledge attitude and practice of key Infant and Young Child Feeding and WASH indicators in the target IDP settlement.
2017 May		Carried out WASH Assessment in Beletweyne and Matabaan Districts, Hiran Region of South-central Somalia. The overall objective of the assessment was to systematically assess the knowledge, attitude and practice in water, hygiene education and sanitation and recommend changes in hygiene education methods. Assessment further sought to establish the causes of AWD recurrence in Hiran Region for possible future intervention.
2016 Dec.		Carried out an assessment of the Strengthening Sustainable Reintegration and Peaceful Coexistence Mechanisms for Somali Returnees and Home communities in Mogadishu and Beletweyne. The aim of the assessment was to determine existing opportunities that support livelihoods and self-reliance for Somali returnees and that can enhance peaceful coexistence among returnees, IDPs and the host communities as well as identify areas that require strengthening.
2016 May		Carried out an accountability assessment of Community Based Management of Acute Malnutrition implemented by a Consortium called Strengthening Nutrition Security (SMS) in South Central Somalia. The objective of this assessment was to identify ways to enhance accountability for the program and improve the effectiveness of existing accountability initiatives.
2015		Conducted a tracer study to evaluate effectiveness of TVET programme in Puntland. Activities involved assessment of quality of training through visits to the TVET centres and enterprises, interviews with TVET graduates and their employers and assessment of marketability of different trade areas.
2015		Drought impact assessment in Qandala, Bandarbayla and Badhan regions in Puntland state of Somalia

2014	Lutheran World Federation	Education and protection needs assessment upper Nile and Unity states of South Sudan
